

Image size guide — gmvis.org

Recommended upload sizes per page (width × height, pixels) · 28 July 2026

Three golden rules

- **Sizes below are recommended** — twice the on-screen size, so photos stay crisp on Retina/4K screens. Bigger is fine (we scale down); smaller than the "minimum" will look soft.
- **Images are auto-cropped to fill their box** (centre-weighted). Keep faces and action near the middle of the frame, and supply the aspect ratio shown to avoid surprise crops.
- **JPG for photos** (quality ~80, ideally under 500 KB) · **PNG for logos** (transparent background). Please include a one-line description of each photo for screen-reader users.

Uploading it yourself — yes, there's a login

Admin area: gmvis.org/admin.html — sign in with the club admin password (sessions last 12 hours).

You can upload yourself, instantly live:

- **Gallery** — photos and videos, each with a title and caption
- **Blog** — write posts, pick a category, attach a cover image, publish or save as draft

Send to us to place (they're built into the pages):

- Home, About and Activities photos · News story images · Sponsor logos

- Email them over with a note of which slot each is for, plus a one-line description per photo — they're usually live the same day

Sizes measured from the live templates at desktop width; recommendations are 2× display size for sharp rendering on high-density screens.
